- Senior Center Lunch Meeting
- CPR Training - Blaine County Health Department Clinic
- CPR Training - Weatherford Fire Department
- In-Service at Weatherford Regional Medical Center - LUCAS 2 and CPAP System
- Advanced Airway Training
- Meet and Greet with Weatherford First United Methodist Church
- Teamwork with Weatherford Police and Fire - cardiac arrest save
- Dinner with Weatherford Fire and Police Departments

Training:

Last month, several of Lifeguard's team members completed their instructor certifications, enabling the company to offer more community and healthcare-provider CPR training. Lifeguard Ambulance had the opportunity to extend CPR training to both the Blaine County Health Department Clinic and Weatherford Fire Department staff.

Lifeguard's EMS Chief provided an in-service with Weatherford Regional Medical Center's respiratory therapists and ER clinical staff. The in-service focus was on the LUCAS 2 CPR device and the flow safe, CPAP system. During the training, he demonstrated proper placement of the LUCAS device to help with compressions during CPR. He also showed the hospital staff how to maintain the flow safe CPAP and deliver nebulizer treatment through it, as

well as how to attach the hospital's CPAP machine without removing the flow safe mask from the patient.

Lifeguard also hosted an advanced airway training, which included both classroom and skills lab training. The anatomy of swine lungs are very similar to human lungs, making the training of proper depth, rate of respiration, and PEEP usage fairly easy.

Community Involvement:

In February, Lifeguard's team had more opportunities to spend time with different community members. One of the Meet and Greets was at the senior center, where the Lifeguard crew interacted with the attendees during lunch, explaining more about the company and service lines, as well as answering their questions as it related to the differences between air and ground EMS needs.

Lifeguard was also welcomed to the community by Weatherford

First United Methodist Church. The church delivered goodie bags for the crews, complete with snacks and a few on-the-road toiletries. The crews were very appreciative of the thoughtfulness of the church.

First Responder Team:

One of the keys to success for an emergency network is the inter-agency teamwork and efforts from the different entities. On numerous occasions, Lifeguard has responded alongside both law enforcement and fire, and it commends the other agencies on their teamwork. Recently, the immediate response from police and the scene assistance from fire played a major role in patient care and outcome.

To further expand those relationships, Lifeguard also hosted dinner for its crews, along with the Weatherford Fire and Police departments. It was an

enjoyable evening for the first responders to spend together and learn more about each other.
