- Community CPR
- Weatherford FD medical training
- Hydro FD medical training

COMMUNITY AND FIRST RESPONDER EDUCATION:

Lifeguard continued its community CPR efforts by certifying 21 community members in CPR.

Lifeguard provided refresher medical training to Weatherford and Hydro Fire Departments, specifically focusing on EMS scene management and the NREMT National Continued Competency Program (NCCP). The NCCP is the recertification requirements for all nationally registered EMTs to maintain their registration status and license. The NREMT requires that all instructor-led continuing education be provided by a certified EMS instructor. Lifeguard has multiple certified instructors and is able to provide the education required for recertification to all area first responders.

Lifeguard and the Weatherford Fire Department have been working in conjunction with the Oklahoma EMT Association to hold a one day conference at the Weatherford Fire Department in March. Lifeguard is providing instructors for this conference. Holding this conference in Weatherford gives us an opportunity to bring in additional first responder education opportunities.
