COMMUNITY INVOLVEMENT/ TRAINING:

- Community CPR
- Wildland Fire standby
- Hydro FD medical training

COMMUNITY AND FIRST RESPONDER EDUCATION:

Lifeguard continued its community CPR efforts by certifying 34 community members in CPR.

Lifeguard assisted with medical training day for Hydro Fire Department and provided instruction on airway management to include King LT airway placement, head injuries, EMS scene management and the NREMT National Continued Competency Program (NCCP). The NCCP is the recertification requirements for all Nationally Registered EMTs to maintain their registration status and license. The NREMT requires that all instructor-led continuing education be provided by a certified EMS instructor. Lifeguard has multiple certified instructors and is able to provide the education required for recertification to all area first responders.

Lifeguard assisted Weatherford Fire Department with personnel support during a large wildland fire event. During this event, Lifeguard shuttled food and water to the firefighters to ensure nutrition and that also gave the EMS crews an opportunity to assess the condition of the firefighters. Lifeguard also assisted with the staging officer function during this event in order to help ensure the accountability of the firefighting resources.

Lifeguard would like to thank the community leaders for the opportunity to provide service for the last year. During this past, Lifeguard has developed an amazing working relationship with the local first responders and healthcare entities, as well as the community at large.
